Replacements
Arthritis Surgery
Hip and Knee Arthroscopy
Orthopaedic Surgery
Fracture Care

Your doctor has ordered an imaging study for you in order to further diagnose and treat your orthopedic condition.

This study will be coordinated through our office, as soon as possible, at a facility convenient for you. Please note that authorization must be obtained through your insurance company before the test can be scheduled. This may take a week or longer. The imaging facility will contact you directly to set up the exam. If you have not heard from the facility or our office at that point, please contact our office.

Once the test is completed, the diagnostic imaging facility will send a copy of the report to our office. Please allow several business days for the provider who ordered your exam to review both the report and the images if they are available. If you have had a series of tests, please understand that all of the exams must be completed in order to accurately interpret the results.

Once you have your exam scheduled, we ask that you call the office at (203) 598-0700 to make a follow-up appointment with your provider to discuss your results.

1579 Straits Turnpike, Suite E, Middlebury, Ct 06762
